

KULDEEP KUMAR

DATA ANALYST

Flat No. 1102, 11th Avenue, Gaur City 2, Greater Noida, UP • +91 7579889544 • kuldeep7579889544@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented and analytical Computer Science & Engineering student specializing in Data Analytics. Skilled in converting raw, complex datasets into clear, actionable business insights using Python, SQL, Power BI, and interactive MS Excel dashboards. Possesses a strong academic foundation in relational database management systems (DBMS), query optimization, and statistical data modeling, eager to contribute analysis and optimization skills to an impact-driven data team.

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, Matplotlib, Seaborn), Java, SQL

Databases & Querying: Relational Databases (DBMS), Joins, Aggregations, Query Optimization, Database Normalization

Data Visualization & Tools: Power BI, MS Excel (Advanced Formulas, Pivot Tables, Dashboards), Git/GitHub

Core Methodologies & Key Skills: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, KPI Tracking, English Typing (40–50 WPM)

DATA ANALYTICS PROJECTS

E-Commerce Sales Performance Analysis

2026

Python, Pandas, Matplotlib, Seaborn

- Cleaned and preprocessed transactional retail datasets using Pandas to handle null values, standardized schemas, and eliminate duplicates.
- Conducted exploratory data analysis (EDA) to map out key performance indicators (KPIs) and regional revenue trends, visualizing patterns using Matplotlib and Seaborn.
- Delivered visual trends pointing out key revenue opportunities, presenting strategic data points to support business decisions.

Retail Inventory Database Design

2026

SQL, DBMS

- Designed and implemented a normalized (3NF) relational database schema for a retail model to reduce data redundancy and maintain strict referential integrity.
- Wrote, restructured, and optimized complex SQL queries with Joins, Group By aggregations, and subqueries to pull inventory stock levels instantly.
- Optimized query performance to reduce data extraction latencies, facilitating high-speed retrieval of product catalogs and supplier metrics.

Regional Demographics Dashboard

2025

MS Excel, Power BI

- Consolidated messy, unstructured demographics datasets utilizing advanced Excel lookup functions (INDEX/MATCH, VLOOKUP) and nested logical conditions.
- Engineered an interactive executive dashboard with functional Pivot Tables, dynamic slicers, and conditional formatting to monitor key region indicators.
- Streamlined monthly reporting workflows to automate data updates, drastically reducing the manual effort required for data ingestion and updates.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

2022 – 2026

Vision Institute of Technology - Aligarh, Uttar Pradesh

- **Academic Performance:** CGPA: 6.5+/10
- **Relevant Coursework:** Database Management Systems (DBMS), Data Structures & Algorithms, Object-Oriented Programming, Applied Statistics

CERTIFICATIONS & TRAINING

- **Python for Data Analysis & Visualization** - Code With Harry | (2026)
- **Mastering SQL & Relational Databases (DBMS)** - Code With Harry | (2026)
- **Advanced Excel for Data Analytics** - Self-Guided | (2025)
- **Diploma / Training in Laptop Hardware & Repairing (4 Months)** - Multitech Institute of Advance Technologies Pvt. Ltd. | (2024)
