

KULDEEP KUMAR

DATA ANALYST

Aligarh, Uttar Pradesh · +91 7579889544 · kuldeep7579889544@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented and analytical Computer Science & Engineering student specializing in **Data Analytics**. Skilled in converting raw, complex datasets into clear, actionable business insights using Python, SQL, and interactive MS Excel dashboards. Possesses a strong academic foundation in relational database management systems (DBMS), query optimization, and statistical data modeling, eager to contribute analysis and optimization skills to an impact-driven data team.

TECHNICAL SKILLS

- Languages: Python (Pandas, NumPy, Matplotlib, Seaborn), Java, SQL
- Databases & Querying: Relational Databases (DBMS), Joins, Aggregations, Query Optimization, Database Normalization
- Data Visualization & Tools: MS Excel (Advanced Formulas, Pivot Tables, Interactive Dashboards, Slicers), Git/GitHub
- Core Methodologies: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, KPI Tracking

DATA ANALYTICS PROJECTS

- E-Commerce Sales Performance Analysis2026

Python, Pandas, Matplotlib, Seaborn

 - Cleaned and preprocessed transactional retail datasets using Pandas to handle null values, standardized schemas, and eliminate duplicates.
 - Conducted exploratory data analysis (EDA) to map out key performance indicators (KPIs) and regional revenue trends, visualizing patterns using Matplotlib and Seaborn.
 - Delivered visual trends pointing out key revenue opportunities, presenting strategic data points to support business decisions.
- Retail Inventory Database Design2026

SQL, DBMS

 - Designed and implemented a normalized (3NF) relational database schema for a retail model to reduce data redundancy and maintain strict referential integrity.
 - Wrote, restructured, and optimized complex SQL queries with Joins, Group By aggregations, and subqueries to pull inventory stock levels instantly.
 - Optimized query performance to reduce data extraction latencies, facilitating high-speed retrieval of product catalogs and supplier metrics.
- Regional Demographics Dashboard2025

MS Excel

 - Consolidated messy, unstructured demographics datasets utilizing advanced Excel lookup functions (INDEX/MATCH, VLOOKUP) and nested logical conditions.
 - Engineered an interactive executive dashboard with functional Pivot Tables, dynamic slicers, and conditional formatting to monitor key region indicators.
 - Streamlined monthly reporting workflows to automate data updates, drastically reducing the manual effort required for data ingestion and updates.

EDUCATION

- Bachelor of Technology in Computer Science & Engineering2022 – 2026

Vision Institute of Technology – Aligarh, Uttar Pradesh

 - Academic Performance:** CGPA: 7+ / 10
 - Relevant Coursework:** Database Management Systems (DBMS), Data Structures & Algorithms, Object-Oriented Programming, Applied Statistics

CERTIFICATIONS

- Python for Data Analysis & Visualization – Code With Harry(2026)
- Mastering SQL & Relational Databases (DBMS) – Code With Harry(2026)
- Advanced Excel for Data Analytics – Self-Guided(2025)
